

# The IceSynergy™ MaximICE® Advantage

**MaximICE Slurry Ice Technology from IceSynergy is changing the way large industrial and commercial operations cool their processes, products and facilities.**

## Process Description

In today's world saving energy is imperative and MaximICE delivers the most energy efficient, large capacity slurry ice systems available anywhere in the world, bar none.

## Combining flexibility with capacity

With single ice generator skid capacities of 3 tons to 400 tons IceSynergy can customize and integrate any size system for your cooling and ice chilling needs. Modular-skid system designs currently in operation range from 3 tons to 800 tons.

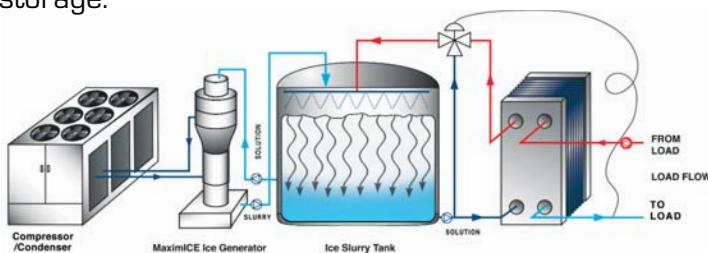

## Meeting needs with patented technology

Powered by our patented Orbital Rod Evaporator, MaximICE® packaged slurry ice systems offer cost savings and unique product quality benefits to a variety of industries such as fish and vegetable packaged ice chilling, food and beverage process cooling, cold storage and HVAC ice thermal storage.

## Providing reliability with a global history

For the past 15 years, MaximICE Slurry Ice Systems have delivered to a wide variety of industries reliable and efficient service in 20 countries in North America, Europe, Asia, and Australia.
